16167	The Visual Studio refactoring support for C# is quite good nowadays (though not half as good as some Java IDE's I've seen already) but I'm really missing C++ support. I have seen Refactor! and am currently trying it out, but maybe one of you guys know a better tool or plugin? I've been working with Visual Assist X now for a week or two and got totally addicted. Thanks for the tip, I'll try to convince my boss to get me a license at work too. I've been bughunting for a few days since Visual Assist X kept messing up my Visual Studio after a few specific refactorings, It took me (and customer support) a week to hunt down but let's say for now that Visual Assist X is not a good combination with ClipX.
